Homework

-The preparation of joining JRCS's project.

Overview

- Create a web app that meets the specifications described in the "Issues" section of this document.

- Any technology, product, or service you choose for implementation can be used as long as it is commonly used recently.
  - However, use React.js for the View stage.
  - With regard to other technologies, products, and services, please tell me why they have been chosen.

- The deadline for submission is 7 days after receipt of this document.
  - If it cannot be finished within 7 days, it can be submitted in an incomplete status.
  - If there is a reason why the job could not be completed, such as being busy with the current job, the circumstances will be considered in the evaluation.
  - Please contact us if you need other schedule adjustments.
    - ✓ If you need to adjust the period, please say immediately after receiving this document.

Other notifications

- Please submit the following materials

  - Complete source code

  - Documents required for execution environment construction

  - Intermediate documents created for design / implementation (if any)

  - Other explanatory documents (if any)

Task

Requirement

- A web application that allows you to freely configure menus in the sidebar

- The side menu has three levels, and you can add menus at the same or lower level by clicking the "+" button next to the menu at each level.

- A page is created on the right side of the main area for each menu and is displayed when that menu is selected.

- The main area page is composed of a title and a body, and can be edited.

- The text should be marked down when editing. Markdown is rendered in HTML after editing and saving.
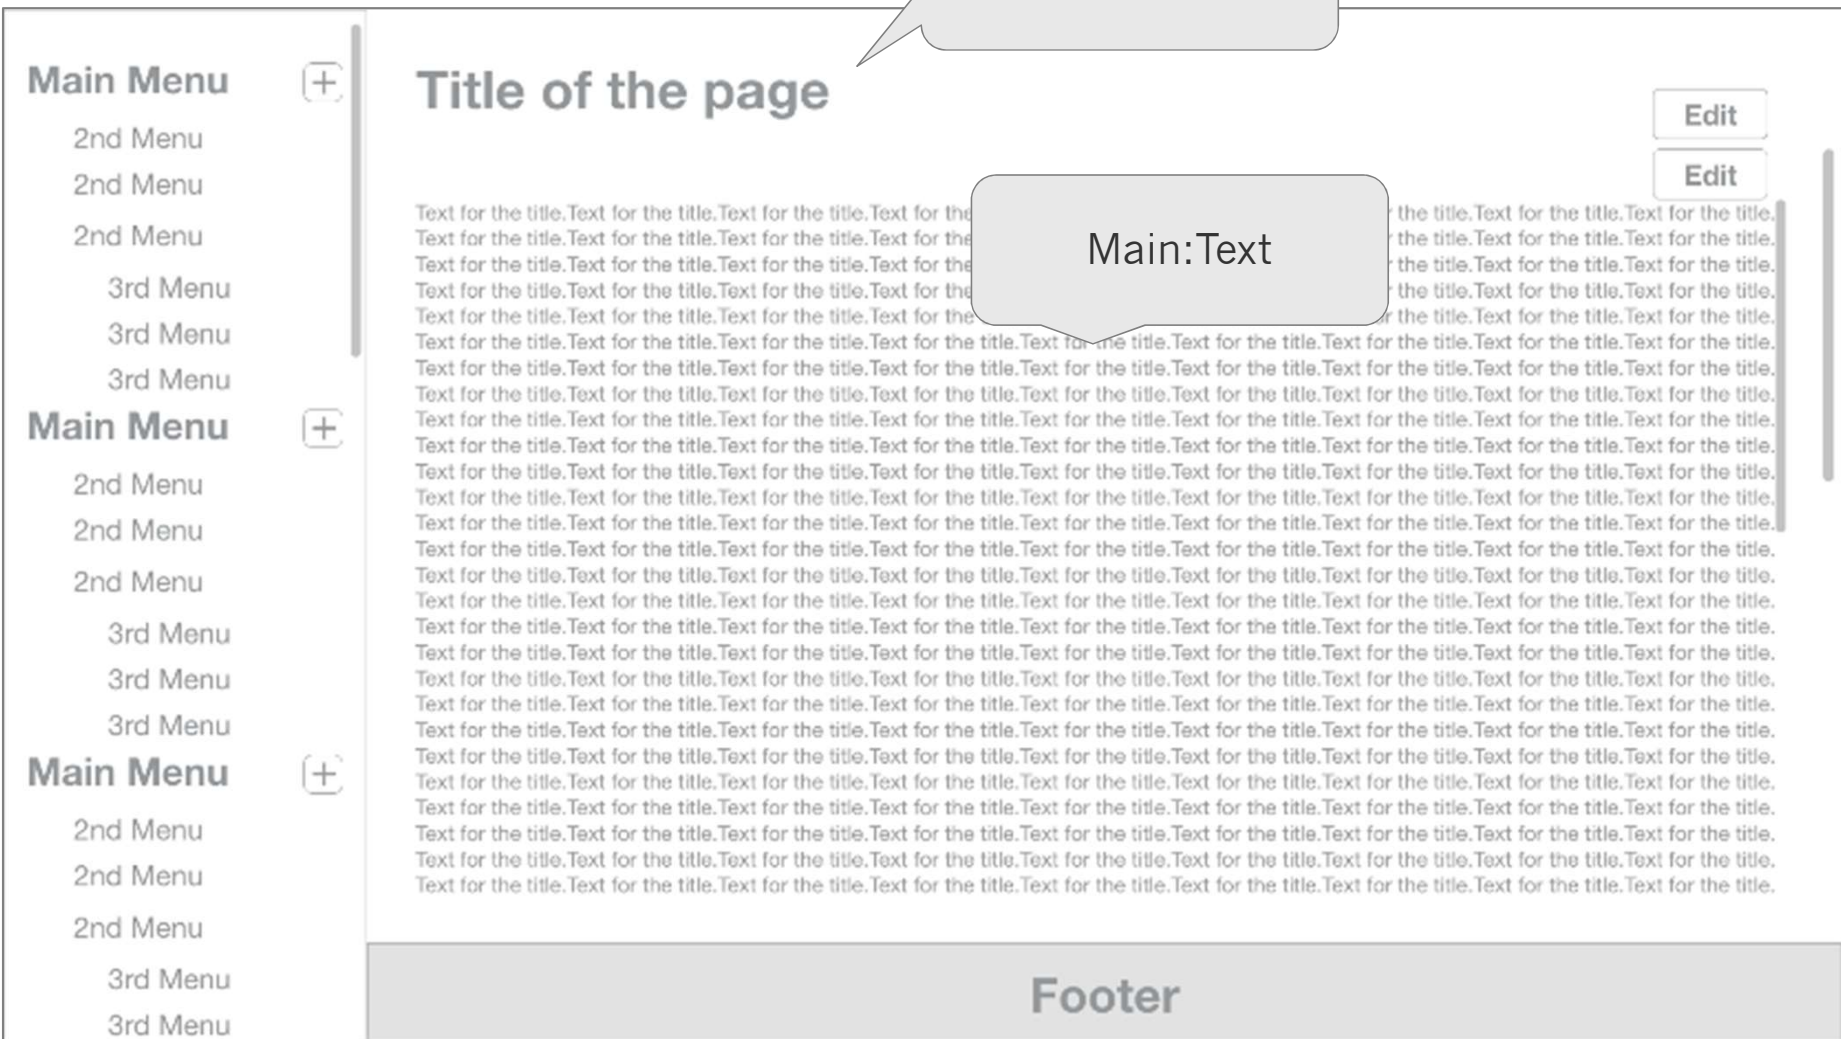

※ The following pages can be confirmed from the following URL
